

We are Manufacturer of  
**VIBRATING SCREENING  
MACHINE**

## Vibrating Screening Machine

Incepted years ago in this domain, we are leading **manufacturer of Vibrating Screening Machine**, which are specially crafted device used in diverse applications across a spectrum of industries, such as food, ceramics, sand and allied coarse or chemicals. **Linux Magnetics** is one of India's outstanding **Vibrating Screen Manufacturers**, which are powered by internal vibratory motor. The offered full range of device is accessible in diverse sizes and types, specifically applicable for different types of industrial applications. These vibrating screens are most commonly preferred screen of the two variants which are accessible in the market with robust screen mainly crafted for coarse and medium fine applications.

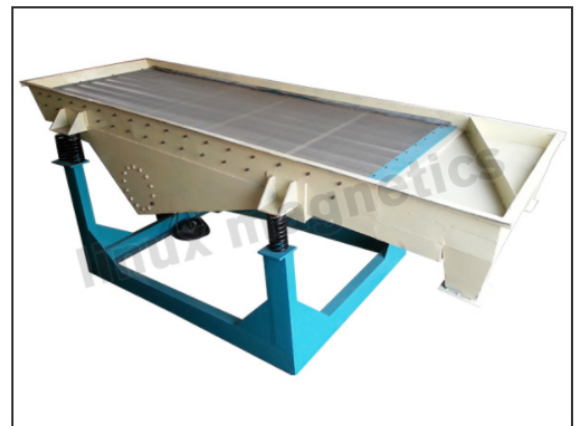

Our products are extensively appropriate in diverse industries for their mixed applications. We present our range of products in diverse sizes and dimensions as well as based on personalized requirements of our customers. This Vibrating Screen is hugely used for grading and screening materials in the fields of minerals, quarry, building materials, etc. Our Vibrating Screen has multi-layers and its screen size is different, due to which it can screen out diverse kind of materials with various sizes. As a prominent manufacturer of **Vibrating Screen in India**, we manufacture products with extreme quality and standards using high grade raw materials.

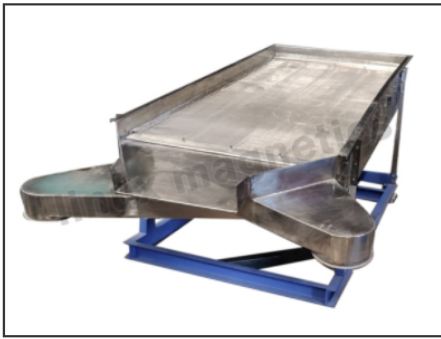

## Vibrating Screening Machine Manufacturer

Linux Magnetics Vibrating Screens are intended to meet and surpass the requesting applications and details expected of screening equipments. Our offered Circular motion included vibrating screen is a two bearing free floating vibrating screen which effectively screen all reasonably free streaming material. The Linux **Vibrating Screen** is designed to be durable for the longest useful wear life and with maximum strength steel to withstand heavy loading.

- ➡ We plan and build the vibrating screen in rectangular shape.
- ➡ The machine offered with various decks according to customer necessity of material division.
- ➡ Main structure is produced using ISMC or IISMA steel area, substantial MS plate use for fundamental body.
- ➡ We additionally give the essential stiffener to body quality.
- ➡ Machine shaft make structure En8 material. The springs are making structure spring steel material, which gives great aftereffect of vibration and longer existence of machine.
- ➡ The screens are making structure spring steel material with MS or SS grade, as appropriate with customer application.
- ➡ The vibrating screen machines are broadly helpful in the quarry industries, stone industries, chemical industries, minerals industries, food and Agro – product industries, and so on...

## Our range of Vibrating Screening Machines include

- ➡ Circular Motion Vibrating Screens
- ➡ Linear Motion Vibrating Screens

## Industries where the offered Vibrating Screening Machines are used

- ➡ Food Industry
- ➡ Agro Industry
- ➡ Ceramics Industry
- ➡ Paper and Plastic Industry
- ➡ Chemical Industry

**Leading Supplier of Vibrating Screening Machines in Ahmedabad, Mumbai, Hyderabad, Kolkata, Delhi, Bangalore, Chennai, Jaipur**

**Leading Exporter of Vibrating Screening Machines in Nigeria, Kuwait, Sri Lanka, Georgia, Yemen, Bangladesh, Nepal, Bhutan, Indonesia, Saudi Arabia, South Africa, Malaysia, Algeria, Iraq, Libya, Qatar, Egypt and Oman**

**Note:** View the full range of screening machines available from Vibrating Screening Machines manufacturer and supplier Linux Magnetics or alternatively contact us for more information.
